## How do I change the log-in email on my account?

Kirsty - 2020-07-29 - Account

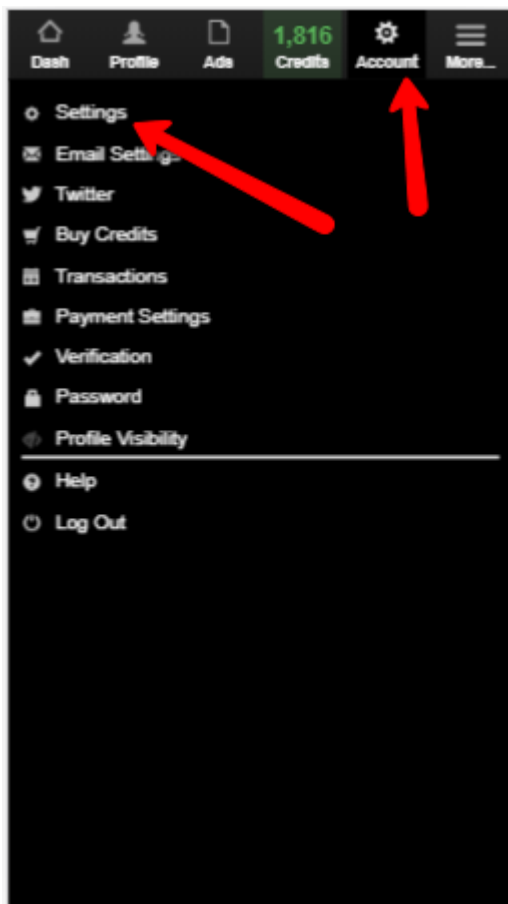

Once logged in, you can change your email address from your settings page

<https://e.slixia.com/account/settings>

You can also access this page by hovering over your stage name at the upper right of your dashboard and selecting the "settings" option.

If you're on your phone, you should select, on the top right of your screen "Account" and then "Settings":

Then, simply update your login information:

A screenshot of the 'Account Settings' page. On the left is a sidebar with a user profile picture and a list of settings: 'Settings' (highlighted in blue), 'Email Settings', 'Twitter', 'Transactions', 'Payment Settings', 'Verification', and 'Help'. The main content area is titled 'Account Settings' and features a red error message box that reads: 'There were errors (missing or incorrect responses) in your selections. Your data has NOT been saved. Please check for errors below (highlighted in red) and correct them before attempting to continue.' Below this is the 'Login Information' section, which contains an 'EMAIL' field with the text 'sample@gmail.com' highlighted in red. A red error message below the field states: 'Your email address is not correct and is bouncing mail (perhaps due to a typo?)'. At the bottom of the page, a note says: 'To change which emails you receive from us, please visit the [Email Settings](#) page.'

Be sure to click the blue "Save" button at the bottom of the page so your changes take effect. You'll then be sent an email asking you to click on a link to confirm your new email address. This last step is for your protection and is necessary for us to ensure it is yourself who is changing the email address on your account.
