Is there a way to deactivate my account while I am away?

Donia - 2020-07-29 - Account

Absolutely!

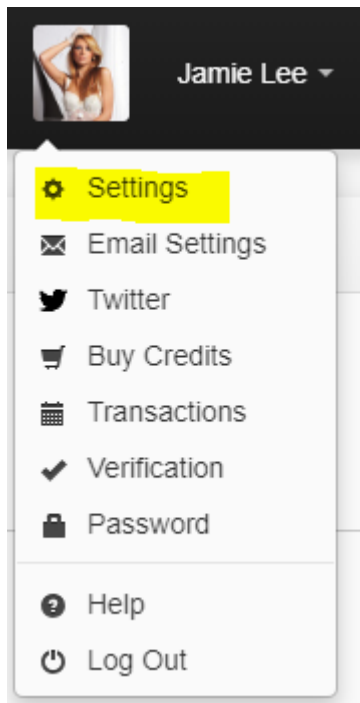

"Hiding" your profile is free and allows you to "pause" your Slixia presence while taking a temporary break or vacation. Your account will still be active so you can log in, make changes, and when you're ready, you can resume it to pick up exactly where you left off.

Hiding your profile will replace your current profile page with a generic avatar image and the message "This user's Slixia profile is currently inactive". Your ads will be paused along with your profile, and you will not be charged for renewals or upgrades.

To hide your profile, login at the link below:

<https://e.slixia.com/account/hide>

Or, if you are already logged in, just click the "Settings" option in the drop down menu in the upper right corner of the screen:

Next, click the "Profile Visibility" option, then tick the box, and click "Hide My Profile":

Profile Visibility

Hiding your profile is free, and allows you to "pause" your Slixia presence while taking a temporary break or vacation. Your account will still be active, you can log in, make changes, and when you're ready, you can resume it to pick up exactly where you left off.

Your profile is currently visible

Hiding your profile will replace your current profile page with a generic avatar image and the message "This user's Slixia profile is currently inactive". Your ads will be paused along with your profile, and you will not be charged for renewals or upgrades.

If you have any questions about this process, please [contact support!](#)

I understand that my profile, ads, and contact information will be hidden, and that visitors will not be able to find or contact me via Slixia while my profile is hidden.
